SUMMARY

Spent six years generating my own pipeline — researching accounts, forming a hypothesis about what the buying organization was actually measured on, and getting in front of them. Reached decision-making lines at Samsung, Hyundai, and SK, and closed at Doosan, Fastfive, and Korea Venture Investment Corp. I did all of it improvising, without a CRM, a playbook, or anyone to correct me. I am applying to a structured sales program because I want the method I never had — including the outbound quota, the coaching, and a narrower scope than I am used to.

⚠ 이 Summary의 마지막 문장이 이 지원의 핵심이다. 지우지 말 것. 과잉스펙 우려에 대해 **먼저 인정하고 답하는** 구조여야 리크루터가 읽는다.

EXPERIENCE

PLANZ COFFEE — Head of Sales & Growth · Seoul 2020 – Mar 2026

Rebuilt the company's customer base from zero after COVID eliminated its original campus channel — running prospecting through close solo.

- **Opened three segments with entirely different buying processes:** startups (Fastfive, fast decisions), large enterprise (Doosan Group, procurement and approval chains), and public sector (Korea Venture Investment Corp, formal tender). Learning each purchase structure was half the job.
- **Reached the decision line at Samsung, Hyundai, and SK.** These stayed at meeting stage and did not become contracts — but getting a first meeting with those organizations was the work, and I generated those meetings myself.
- **Built my own prospect list before running outbound on it.** There was no list to buy, so I assembled the target database from web crawling and government open data, then ran direct mail against it — **1,000 pieces returned roughly 4 contracts**, including POSCO Mobility. Research and list-building were the job before the outreach was.
- **Ran every other demand channel too** — paid acquisition (Aton, Duksan Neolux, Neptune), Naver SEO that I optimized myself (CJ OliveNetworks), trade shows (Xi S&D), seminars, and PR as conversion support. A blog I wrote for its own sake became the SK D&D contract.
- **Led with discovery, not the product.** In every deal that closed, the stated request and the real problem differed: Xi S&D wanted a differentiator for apartment-complex bids, CJ OliveNetworks had departments pushing facility management onto each other, Doosan Tesna had a breaking incumbent system. Interviews came before any pitch.
- **Lost Hyundai Motor and diagnosed why.** The competitor was selling an ESG angle through reusable goods; I had approached on product strength alone and learned too late that HR and General Affairs were measured on ESG. I drove a product change in response, which went into the Amorepacific and LG Electronics wins.
- **Six-month Product Owner sprint program** (participant; introduced via FuturePlay, working to the CPO of Yeogi Eottae) — carried the leisure & recreation product area through the program. After ten years of deciding alone, working to someone else's method was the part I most wanted more of.
- **Hired and managed a BDR from 2023**, after doing the prospecting myself for three years. I set what counted as a qualified handoff and coached against it — which is also why I know what I am applying for here, and why a structured program is what I want rather than something I am settling for.
- Closed 30–40 contracts per year, typically KRW 0.8–1.0M/month; annual churn ~4%.

PLANZ COFFEE — Marketing Director · Seoul · 2016 – 2019

- Campus channel; two-person team with the CEO covering product planning, design, and sales strategy. Work was not divided between us in this period.

CERTIFICATION & EDUCATION

- **Salesforce Certified Platform Administrator** — Aug 2026 · Credential ID 8066536

- **Salesforce AI CRM Engineer Program** — 616 hours, May – Sep 2026. **Selected as Program MVP** among course completers, cited for team communication and helping peers understand the material.
- **CorePress** (FICTIONAL / EDUCATIONAL POC — 6-person team) — **led the team; first prize at final presentation.**
- Tools: Salesforce, Trello, Asana, Relate, SQL, Figma, Adobe CC

Kyung Hee University, Seoul — Biology, 2013 – 2018 (coursework completed; degree not conferred)
