PROFILE

B2B sales practitioner turning customer needs and budget constraints into contracts. Pursuing Agentforce sales at Salesforce, combining discovery, negotiation and closing with hands-on CRM development. Administrator certification, an award-winning team project and ongoing AI agent training build on my commercial experience.

TECHNICAL TRAINING & PROJECTS

Salesforce Certified Platform Administrator Aug 2026

Credential ID 8066536 | Preparing for Agentforce Specialist certification

Salesforce AI CRM Engineer Program Sep 2026

Selected as Program MVP among 23 participants, recognized by peers for my contribution to the cohort.

CorePress | Fictional educational team POC

Grand Prize, 1st of 4 projects. As technical PM and six-person team lead, aligned requirements with the PL and teammates, built the Experience Cloud portal and led the final presentation.

MegazoneCloud NOW Oct 6, 2026 - Present

AI Agent Engineer Program. Curriculum: Python/FastAPI, LangChain/LangGraph, RAG, vector databases and AWS deployment.

Media-production AX | Self-directed PoC design

Designed a **five-agent, Bedrock-based workflow** for a fictional media producer, with human approval, evidence tracking and PoC metrics. **Agentforce / MCP integration** is a proposed extension.

EXPERIENCE

Planz Coffee 2017 - 2026

B2B Sales & Business Operations Manager

Unmanned robotic cafés, workplace café management software & managed operations | Co-founding team member

- Held responsibility for **KRW 2 billion in annual revenue** across beverage sales, solution contracts and equipment sales. Secured approximately **20 unit contracts per year** in 2024-2025; led small/midsize-office sales, primarily through inbound opportunities.
- Owned the sales cycle from discovery and proposals to pricing, negotiation and closing; coordinated installation and operations with delivery teams.
- Negotiated a partnership MOU with Xi S&D over **four months**. Positioned unmanned cafés as a residential-service differentiator and worked with GS E&C to clarify requirements for local business registration.
- Ran **six demand-generation channels**: direct mail, paid media, PR, outbound, exhibitions and seminars to create customer conversations.
- Managed approximately **150 opportunities annually**, with an average contract conversion rate of **18-20%**. Used Trello, Asana and Relate to track stages and prioritize follow-ups by buying timing and deal viability.

SELECTED DEALS

CJ OliveNetworks | Five-unit contract

- Closed **five units** in May 2025 after an **18-month sales cycle**. Interviewed HR, facilities and general affairs stakeholders to identify café-management burdens across offices.
- Proposed an internal sales budget to absorb the incumbent contract's termination penalty, removing the switching-cost barrier and sustaining follow-up through closing.

Doosan Tesna | One-year pilot to two additional sites

- Expanded from a one-year Seo-Anseong pilot to Pyeongtaek HQ and Anseong. Coordinated service and space design for the broader rollout.
- Included support for existing equipment in the proposal, reducing the customer's maintenance burden without requiring immediate replacement.

SK D&D | Two-unit sale plus managed operations

- Won a **two-unit contract** for Guro Think Factory. Converted an inquiry from my workplace-remodeling article into a commercial opportunity.
- Aligned with the design team's purchasing authority and budget by proposing equipment ownership with outsourced operations instead of a monthly subscription.

Hyundai Motor loss | Applied learning to later wins

- Identified ESG as an overlooked buying criterion after losing the Yangjae HQ opportunity; helped adapt equipment for tumblers and develop a reusable-cup proposition.
- Applied the revised offer to subsequent **Amorepacific and LG Electronics** contracts. Shifted the proposal from product features to the outcomes buyers were measured on.

CAPABILITIES

Commercial: Customer discovery, value-based proposals, total-cost comparison, pricing, negotiation, closing and account expansion.

Execution: Pipeline management, stakeholder alignment, cross-functional coordination, presentations and multichannel demand generation.

CRM & productivity: Salesforce, Trello, Asana, Relate, Excel, Google Sheets, PowerPoint.

Design: Adobe Illustrator, Adobe Photoshop, Zeplin, Figma, **Claude Design, Higgsfield**.

Salesforce development: Data libraries; agent development and Slack integration; Experience Cloud / LWC and backend development; Flow and Apex automation with Agentforce Vibes.
Development tools: SFDX, MCP and CLI workflows with Codex and Claude Code; Python, Git. Working knowledge of SQL and JavaScript.

EDUCATION

Kyung Hee University (Seoul) | Biology

Undergraduate studies, 2013 - 2018 | Coursework completed; no degree awarded.
